Full Description

The regular shaped fields here are surrounded by planted tree belts used by the Clarendon Estate for hunting and other leisure purposes.

The 1 ed 6" OS map shows regular enclosure of land that was probably once open - as indicated on the 1 ed 1" OS map. The former park pale relating to the deerpark lines the northern and western borders of this land parcel.

One farms as part of the Clarendon Estate exist here and are shown on the historic mapping.

Full Description

Land appears to have once been open downland - according to placename evidence and the depiction on the 1 ed 6" OS map.

The morphology of this parcel may suggest woodland once existed here but there is no clear evidence for this on the sources available - so would be early woodland if this were the case.

Full Description

This land parcel is shown as being subject to Parliamentary Enclosure Act (1820), on the Enclosure Award mapping. However, the 1 ed 6" OS map seems to show the area as still being predominantly downland in character rather than fields created by this act.

Aerial photographs and the 1 ed 6" OS map mark an ancient field system here but it is not easy to identify this character in the modern landscape or ascertain a date for this old field system.

This former WWI and WWII airfield has been converted into commercial use recently - but this has not really affected its character. Prior to the airfield, the land here appears to have been an open area - possibly grassland.

Broad Type Military **Type** Military airfield **Confidence** Certain

Period C21 - 2012 AD?

Previous Types

Previous Broad Type Unimproved land **Previous Type** Unimproved grassland **Confidence** Probable

Post Medieval to Late C19 - 1540 AD? to 1894 AD?

Full Description

This land parcel is shown as being subject to Parliamentary Enclosure Act (1820), on the Enclosure Award mapping. However, seems most likely to be enclosure of downland rather than creation of fields.

As the airfield has historically had grass runways etc. it seems likely that rather than converting an arable area to grass, the airfield may use of an existing grassy area - hence the choice of previous HLC type.

Unimproved land Downland Probable

Post Medieval to Late C19 - 1540 AD? to 1894 AD?

Full Description

This land parcel is shown as being subject to Parliamentary Enclosure Act (1800), on the Enclosure Award mapping. However, seems most likely to be enclosure of downland rather than creation of fields.

Despite location north of Old Sarum hillfort, no obvious landscape evidence of prehistoric activity is legible in the current landscape.

These modern fields have been created in an area of former downland. It is likely that it was partitioned in the past and may have been enclosed. This may explain the presence of the tree-lined routeways here.

Full Description

Land here not subject to enclosure act but like elsewhere the downland here was likely to have been formalised in the C18-C19.

Although a park once existed to the SW of this area (at Little Durnford) the tree lined routeways here are more likely to relate to ownership or even earlier parish boundaries.

Full Description

Part of this area is shown as being subject to Parliamentary Enclosure Act (1800), on the Enclosure Award mapping. However, it seems unlikely that this enclosure had a material affect on the land use, as it appears to have involved the enclosure of downland rather than the creation of field parcels.

The line of the Roman road forms the northern boundary to this land parcel.

Full Description

This land parcel is shown as being subject to Parliamentary Enclosure Act (1800), on the Enclosure Award mapping. However, this appears to have enclosure of downland rather than the creation of field parcels. Therefore the prior character is best described as downland rather than Parliamentary fields.

These allotments have late C19/early C20 origins. They show on all of the historic OS maps. Whilst the area they occupy has expanded over time, the fundamental character has altered little. There is no evidence for land use prior to their creation.

Broad Type Type Confidence
Orchards and horticulture Allotments Certain

Period Post Medieval to C21 - 1540 AD? to 2012 AD

Previous Types - None recorded

Full Description

No obvious indication of the prior character can be gained from the available mapping sources. Whilst there are some other character types in this area, the allotments constitute the dominant one.

Field count here is based on the number of blocks of allotments, as they are too numerous to count individually.

The use of the land as allotments may be linked to the creation of the railway and the use of marginal land linked to this construction.

Full Description

This land parcel is shown as being subject to Parliamentary Enclosure Act (1820), on the Enclosure Award mapping. However, this appears to have enclosure of downland rather than the creation of field parcels. Therefore the prior character is best described as downland rather than Parliamentary fields.

Mix of older terraces and newer estate homes here, but the latter predominate. All are of late C20 date.
